We are making our range of fibre patch panels even easier to specify and install with a number of design changes and improvements – at no extra cost! – read on for more details

New Features

- Ball-bearing sliding drawer for smooth operation
- Recessed (flangeless) adaptors provide larger labelling field
- Optional patch cord management bar with additional labelling options
- Greater range – OS2, OM3 and OM4
- Blue (OS2), Aqua (OM3) and Violet (OM4) adaptors
- High quality zirconia ceramic alignment sleeves
- Options for pre-loaded splice cassettes
- Options for pre-loaded 12-colour pigtails
- Full installation kit included
- New 24-way splice holders included
- Ideal for splicing and pre-terminated cables
- Excel 25-year system warranty

Excel's new range of Enbeam fibre optic patch panels offer many improvements, additional features and extended range options. The new sliding drawer features ball-bearing runners for smooth operation and rigidity. Finger pulls are included on the front panel.

The use of recessed, flangeless, adaptors creates increased space for port and panel labelling, and makes the panel facia more aesthetically pleasing.

Also, new to the range is the optional patch cord management bar with hinged front plate for ease of access. Behind the front plate is a full width/full height labelling field. The management bar is easily attached and removed as required with 4 screws (provided).

The new range offers ST, SC and LC versions, both singlemode and multimode. The SC and LC multimode panels are available with beige, aqua or heather violet adaptors as required for OM1, OM2, OM3 and OM4 fibre types and Blue for OS2 connectivity

The LC versions have a maximum capacity of 96 fibres (24 quad adaptors).
All panels are supplied with a fitting kit which includes mountings, cage nuts & screws, glands, cable ties and our new 24-way splice holder.

Further options include splice cassettes and pigtails pre-installed. The pigtails are supplied in 12-colours pre-loaded into cassettes according to TIA 598 colour code standard.

Effective: Friday 26th May 2017

Excel is a world-class premium performing end-to-end infrastructure solution – designed, manufactured, supported and delivered – without compromise.
